The Connecticut Department of Social Services dental program, known as the Connecticut Dental Health Partnership, follows the American Academy of Pediatric Dentistry’s guidelines for periodicity of examination and preventive dental services, anticipatory guidance and treatment for infants, children, teenagers and young adults up to the age of twenty-one. Continuity of care is based upon each child’s needs and should be performed at an established dental home. Anticipatory guidance and counseling are considered to be an integral of each visit.

First Dental Visit
When the first tooth erupts no later than 1 year of age

Recommendation for dental visit for patients 6 to 12 months of age:
