June 2020

To HUSKY Health members,

We write to you today about the violence, racism, and injustice that people of color continue to experience in this culture. George Floyd, Ahmaud Arbery, and Breonna Taylor are some of the recent victims of such violence and injustice.

The HUSKY Health program is against racism, violence, and injustice of any kind. We believe in aiming for a society where people of color also have equal opportunities to live fruitful and healthy lives. Through the work we do and by listening and understanding, we hope to bring comfort and healing to our members and the community.

This is not just a moment or a trend, but an important part of our values and mission. We stand in support and solidarity.
