

PROVIDER POLICIES & PROCEDURES

GENDER AFFIRMATION SURGERY

The primary purpose of this policy is to assist providers enrolled in the Connecticut Medical Assistance Program (CMAP) with the information needed to support a medical necessity determination for gender affirmation surgery. By clarifying the information needed for prior authorization of services, HUSKY Health hopes to facilitate timely review of requests so that individuals obtain the medically necessary care they need as quickly as possible.

Gender affirmation may involve social, medical and/or legal steps that affirm a person's gender. Gender affirmation surgery is one of the possible steps in this process. This surgery includes a variety of procedures that some transgender or gender diverse people may use to affirm their gender. Gender affirming surgery includes pelvic or gonadal surgery (hysterectomy, orchiectomy, ovariectomy, or salpingo-oophorectomy), genital surgery (clitoroplasty, labiaplasty, metoidioplasty, penectomy, phalloplasty, scrotoplasty, urethroplasty, vaginectomy, vaginoplasty, or placement of penile or testicular prostheses), chest surgery (mastectomy, augmentation), facial surgery, reduction thyrochondroplasty, and voice surgery. This policy describes the procedures that are covered as part of gender affirmation surgery and the criteria that are required for coverage.

CLINICAL GUIDELINE

Coverage guidelines for gender affirmation surgery are made in accordance with the CT Department of Social Services (DSS) definition of Medical Necessity. The following criteria are guidelines *only*. Coverage determinations are based on an assessment of the individual and their unique clinical needs. If the guidelines conflict with the definition of Medical Necessity, the definition of Medical Necessity shall prevail. The guidelines are as follows:

Adults

Gender affirming pelvic/gonadal, genital, and chest surgery (mastectomy/augmentation) is considered medically necessary when all of the following criteria are met:

- A. The individual verbalizes understanding of the effect of gender-affirming pelvic/gonadal and genital surgical intervention on future reproduction or the effect of chest surgery on future lactation;
- B. Gender incongruence/diversity is marked and sustained;
- C. One referral letter from a treating provider*;
- D. If significant medical or mental health concerns are present, documentation from the treating provider that they do not interfere with self-identification and do not put the individual at unreasonable risk; and
- E. Stable on hormonal therapy unless medically contraindicated or not desired.

*Treating provider is a health care professional with competency in assessment of transgender and gender diverse people who have a therapeutic relationship with the individual. Examples include, but are not limited to, a qualified mental health professional, primary care provider, endocrinologist.

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

Other gender affirming surgery* (non-breast/chest surgeries, non-pelvic/gonadal surgeries may be considered reconstructive, and therefore medically necessary, when all of the following criteria are met:

- A. Gender incongruence/diversity is marked and sustained;
- B. One referral letter from a treating provider**;
- C. If significant medical or mental health concerns are present, documentation from the treating provider that they do not interfere with self-identification and do not put the individual at unreasonable risk;
- D. Stable on hormonal therapy unless medically contraindicated or not desired; and
- E. There is no documentation or indication that the surgery or procedure is being done for any reason other than feminization, masculinization, or non-binary transition (e.g., to improve appearance unrelated to gender transition/affirmation, or to reverse the appearance of normal aging, or to correct medical or surgical problems unrelated to gender transition/affirmation [however if potentially indicated for other reasons, the surgery or procedure might be considered medically necessary reconstructive surgery].)

*Other Gender Affirming Surgery:

- Body contouring
- Facial feminization
- Facial masculinization
- Blepharoplasty
- Breast augmentation after initial augmentation mammoplasty
- Brow lift
- Calf implants
- Gluteal augmentation
- Jaw reduction (jaw contouring)
- Lip reduction/enhancement
- Lipofilling/collagen injections
- Liposuction
- Nose implants
- Pectoral implants
- Rhinoplasty
- Thyroid cartilage reduction (chondroplasty)
- Voice modification surgery

**Treating provider is a health care professional with competency in the assessment of transgender and gender diverse people who has a therapeutic relationship with the individual. Examples include, but are not limited to, a qualified mental health professional, primary care provider, endocrinologist.

Adolescents

Gender affirming surgery for individuals under 18 years of age will be reviewed on a case-by-case basis, when all of the following criteria are met:

- A. Documentation from the treating provider that includes all of the following:
 - 1. Gender incongruence is marked and sustained over time;
 - 2. A statement that the individual demonstrates the emotional and cognitive maturity required to provide informed consent/assent for the procedure(s);
 - 3. A statement that the individual has been informed of the reproductive effects of the requested surgical procedure(s) in the context of their stage of pubertal development;

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

2

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

4. An assessment of parental/guardian support;
5. An assessment of the individual's ability to adhere to post-surgical recommendations;
- B. One referral letter from a qualified mental health professional*;
- C. If significant medical or mental health concerns are present, a statement from the treating provider that they are reasonably well controlled; and
- D. Unless contraindicated or not desired, has received at least 12 months of gender-affirming hormone therapy, if required, to achieve the desired surgical result.

Phalloplasty is not covered in individuals under the age of 18 at this time given its complexity and high rates of complications when compared to other gender-affirming treatments.

***Characteristics of a Qualified Mental Health Professional (From WPATH SOC VIII – Mental Health):**

- Master's degree or equivalent in a clinical behavioral science field granted by an institution accredited by the appropriate national accrediting board. The professional should also have documented credentials from the relevant licensing board or equivalent;
- Competence in using the Diagnostic Statistical Manual of Mental Disorders and/or the International Classification of Disease for diagnostic purposes;
- Ability to recognize and diagnose co-existing mental health concerns and to distinguish these from gender incongruence/diversity; and
- Knowledgeable about transgender and gender diverse individuals, and the assessment and treatment of gender incongruence/diversity.

Hair Removal/Hairplasty

- Hair removal procedures to treat tissue donor sites for a planned phalloplasty or vaginoplasty are considered medically necessary.
- The use of laser hair removal for facial feminization may be considered medically necessary if the above criteria for *other gender affirming surgery* are met.
- Electrolysis is typically considered not medically necessary. Requests will be reviewed on a case-by-case basis and may be covered for those individuals seeking hair removal as part of facial feminization when there is documentation from a treating medical provider indicating why laser hair removal is contraindicated or ineffective for the individual.
- Hair removal on other body areas (e.g., legs, arms) is considered cosmetic and not medically necessary.
- Hairplasty/hair transplants are considered cosmetic and not medically necessary.

Surgical Revision

Surgery to refine the results of a previous surgical procedure, including breast augmentation, mastectomy, facial feminization, and genital reconstruction may be considered medically necessary if the surgery is needed to address a functional impairment resulting from the previous surgery. If not reconstructive in nature, the procedure will be considered cosmetic and therefore not medically necessary.

Documentation from the medical/surgical provider describing the impairment is required.

Reversal

Reversal of a prior gender affirming surgical procedure is considered gender-affirming care. The applicable criteria, as outlined above, for gender-affirming surgical procedures would apply.

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

Cosmetic Procedures for Aging Skin

Procedures to address aging skin (e.g., loose skin on cheeks and jawline, wrinkles [brow furrows, frown lines, crow's feet, laugh lines etc.], eye bags, sun damage, age spots, drooping eyelids, thinning/creases/wrinkles of skin of face/chest) are not reconstructive in nature and are therefore considered *cosmetic* and *not* medically necessary. These procedures include but are not limited to:

- Chemical peels
- Dermabrasion
- Laser resurfacing
- Use of radio waves
- Intense pulsed light technology
- Botulinum toxin
- Cosmetic fillers (including collagen, hyaluronic acid injections, fat transplantation and implants)
- Facelift or other skin tightening procedures
- Brow lift
- Eyelid procedures

EPSDT Special Provision

Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) is a federal Medicaid requirement that requires the Connecticut Medical Assistance Program (CMAP) to cover services, products, or procedures for Medicaid enrollees under 21 years of age where the service or good is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination. The applicable definition of medical necessity is set forth in Conn. Gen. Stat. Section 17b-259b (2011) [ref. CMAP Provider Bulletin PB 2011-36].

PROCEDURE

Prior authorization of gender affirmation surgery is required. Requests for coverage will be reviewed in accordance with the processes in place for reviewing requests for surgical procedures. Coverage determinations will be based upon a review of requested and/or submitted case-specific information.

The following information is needed to review requests for gender affirmation surgery:

1. Fully completed Outpatient Prior Authorization Request Form or fully completed authorization request via on-line web portal; and
2. Documentation from the referring provider which supports the medical necessity of the requested procedure(s), and which includes all documentation and referrals outlined in the above criteria.

EFFECTIVE DATE

This Policy is effective for prior authorization requests for gender affirmation surgery for individuals covered under the HUSKY Health Program beginning April 2, 2015.

LIMITATIONS

N/A

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

DEFINITIONS

1. **HUSKY A:** Connecticut children and their parents or a relative caregiver; and pregnant women may qualify for HUSKY A (also known as Medicaid). Income limits apply.
2. **HUSKY B:** Uninsured children under the age of 19 in higher income households may be eligible for HUSKY B (also known as the Children's Health Insurance Program) depending on their family income level. Family cost-sharing may apply.
3. **HUSKY C:** Connecticut residents who are age 65 or older or residents who are ages 18-64 and who are blind, or have another disability, may qualify for Medicaid coverage under HUSKY C (this includes Medicaid for Employees with Disabilities (MED-Connect), if working). Income and asset limits apply.
4. **HUSKY D:** Connecticut residents who are ages 19-64 without dependent children and who: (1) do not qualify for HUSKY A; (2) do not receive Medicare; and (3) are not pregnant, may qualify for HUSKY D (also known as Medicaid for the Lowest-Income populations).
5. **HUSKY Health Program:** The HUSKY A, HUSKY B, HUSKY C, HUSKY D and HUSKY Limited Benefit programs, collectively.
6. **HUSKY Limited Benefit Program or HUSKY, LBP:** Connecticut's implementation of limited health insurance coverage under Medicaid for individuals with tuberculosis or for family planning purposes and such coverage is substantially less than the full Medicaid coverage.
7. **Medically Necessary or Medical Necessity:** (as defined in Connecticut General Statutes § 17b-259b) Those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.
8. **Prior Authorization:** A process for approving covered services prior to the delivery of the service or initiation of the plan of care based on a determination by CHNCT as to whether the requested service is medically necessary.
