

## PROVIDER POLICIES & PROCEDURES

### HEMGENIX® (etranacogene dezaparvovec-drlb)

The primary purpose of this document is to assist providers enrolled in the Connecticut Medical Assistance Program (CMAP) with the information needed to support a medical necessity determination for gene therapy for hemophilia B with Hemgenix. By clarifying the information needed for prior authorization of services, HUSKY Health hopes to facilitate timely review of requests so that individuals obtain the medically necessary care they need as quickly as possible.

Hemophilia B is a rare hereditary bleeding disorder caused by deficiency of coagulation factor IX, it is an X-linked recessive disorder primarily affecting males. People with hemophilia B are at risk for excessive and recurrent spontaneous and/or post-traumatic bleeding, which can be life-threatening, particularly in those with severe disease.

**Hemgenix** is a one-time adeno-associated virus vector-based gene therapy indicated for the treatment of adults with hemophilia B (congenital factor IX deficiency) who:

- Are currently receiving routine factor IX prophylaxis therapy, or
- Have a current or historical life-threatening hemorrhage, or
- Have a history of serious spontaneous bleeding episodes.

With Hemgenix, the factor IX-Padua gene is contained within an adeno-associated viral vector serotype 5 (AAV5) used to introduce a functional copy of the F9 gene into a patient's hepatocytes. The efficacy of Hemgenix was evaluated in a prospective, open-label, single-dose, single arm, multi-national study (n = 54) which enrolled adult males with severe or moderately severe Hemophilia B ( $\leq 2\%$  of normal circulating factor IX). A single infusion with Hemgenix results in cell transduction and offers elevated and sustained factor IX levels, a decreased need for routine factor IX prophylaxis, and a reduction in annualized bleeding rate in patients with hemophilia B.

### CLINICAL GUIDELINE

Coverage decisions for the use of Hemgenix will be made in accordance with the DSS definition of Medical Necessity. The following criteria are guidelines *only*. Coverage decisions are based on an assessment of the individual and their unique clinical needs. If the guidelines conflict with the definition of Medical Necessity, the definition of Medical Necessity shall prevail. The guidelines are as follows:

Treatment with Hemgenix may be considered medically necessary when ALL of the following criteria are met:

- A. The individual is 18 years of age or older; **AND**
- B. The individual has severe or moderately severe factor IX deficiency ( $\leq 2\%$  of normal circulating factor IX); **AND**
- C. Treatment is prescribed by or in consultation with a hematologist; **AND**

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on [www.ct.gov/husky](http://www.ct.gov/husky) by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at [www.ctdssmap.com](http://www.ctdssmap.com).

- D. The individual has not previously received gene therapy for hemophilia B; **AND**
- E. The individual meets ONE of the following criteria:
  - a. The individual is currently using factor IX prophylaxis; **OR**
  - b. The individual has a current or history of a life-threatening hemorrhage; **OR**
  - c. The individual has a history of repeated, serious spontaneous bleeding episodes; **AND**
- F. BOTH of the following apply:
  - a. The individual has had a negative factor IX inhibitor test ( $\leq 0.6$  Bethesda Units [BU]) within the last 30 days; **AND**
  - b. The individual does not have any history of inhibitors to factor IX; **AND**
- G. The individual does not have serological evidence of HIV1 or HIV2 infection with either CD4+ cell count  $\leq 200$  mm<sup>3</sup> and/or a viral load  $>20$  copies/mL; **AND**
- H. The individual does not have an active infection of Hepatitis B virus or Hepatitis C virus; **AND**
- I. The individual is not on antiviral therapy for Hepatitis B virus or Hepatitis C virus infection; **AND**
- J. ALL of the following apply:
  - a. The provider attests that the individual does not have a history of significant liver or biliary disease; **AND**
  - b. All baseline liver health assessments have been performed as outlined in the prescribing information and procedure section below; **AND**
  - c. The provider attests that the liver function and factor IX activity will be monitored after gene therapy administration as outlined in the package insert; **AND**
- K. The provider will follow all FDA recommendations for dosage, preparation, administration, additional monitoring, and patient education.

### **Investigational and Not Medically Necessary**

The safety and efficacy of repeat administration of Hemgenix has not been clinically evaluated and is therefore considered investigational and not medically necessary. Hemgenix is considered investigational and not medically necessary for all other indications.

### **NOTE: EPSDT Special Provision**

Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) is a federal Medicaid requirement that requires the Connecticut Medical Assistance Program (CMAP) to cover services, products, or procedures for Medicaid enrollees under 21 years of age where the service or good is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination. The applicable definition of medical necessity is set forth in Conn. Gen. Stat. Section 17b-259b (2011) [ref. CMAP Provider Bulletin PB 2011-36].

### **PROCEDURE**

Prior authorization of Hemgenix is required. Coverage determinations will be based upon a review of requested and/or submitted case-specific information.

### **The following information is needed to review requests for Hemgenix:**

1. Fully completed State of Connecticut, Department of Social Services HUSKY Health Program Hemgenix Prior Authorization Request form (to include physician's order and signature);
2. Clinical documentation supporting the medical necessity of treatment with Hemgenix including the following:
  - a. Baseline testing confirming:
    - i. Severe or moderately severe factor IX deficiency ( $\leq 2\%$  of normal circulating factor IX);

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on [www.ct.gov/husky](http://www.ct.gov/husky) by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at [www.ctdssmap.com](http://www.ctdssmap.com).

- ii. Negative factor IX inhibitor test dated within the previous 30 days;
- iii. Absence of uncontrolled HIV infection;
- iv. Liver health assessments including:
  - 1. Liver function tests confirming absence of significant liver disease;
  - 2. Laboratory testing confirming absence of active hepatitis B virus or hepatitis C virus infection;
  - 3. Elastography and/or ultrasound and other laboratory assessments for liver fibrosis;
- b. A letter of medical necessity and a signed provider attestation confirming the following:
  - i. ONE of the following apply:
    - 1. The individual is currently using factor IX prophylaxis; **OR**
    - 2. The individual has a current or history of a life-threatening hemorrhage; **OR**
    - 3. The individual has a history of repeated, serious spontaneous bleeding episodes;
  - ii. The individual has not previously received gene therapy for hemophilia B;
  - iii. The individual is not on antiviral therapy for Hepatitis B virus or Hepatitis C virus infection;
  - iv. The individual does not have a history of significant liver or biliary disease;
  - v. The individual does not have any history of inhibitors to factor IX;
  - vi. Liver function and factor IX activity will be monitored after gene therapy administration as outlined in the package insert;
  - vii. The provider will follow all FDA recommendations for dosage, preparation, administration, additional monitoring, and patient education; **AND**
- 3. Other information as requested.

**Initial Authorization**

If approved, authorization will be given for a one-time, single-dose intravenous infusion of Hemgenix.

**Reauthorization**

N/A

**EFFECTIVE DATE**

This Policy for the prior authorization of Hemgenix for individuals covered under the HUSKY Health Program is effective May 1, 2025.

**LIMITATIONS**

N/A

**CODES:**

Code	Definition
J1411	Injection, etranacogene dezaparvovec-hyphendriib, per therapeutic dose

**DEFINITIONS**

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on [www.ct.gov/husky](http://www.ct.gov/husky) by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at [www.ctdssmap.com](http://www.ctdssmap.com).

1. **HUSKY A:** Connecticut children and their parents or a relative caregiver; and pregnant women may qualify for HUSKY A (also known as Medicaid). Income limits apply.
2. **HUSKY B:** Uninsured children under the age of 19 in higher income households may be eligible for HUSKY B (also known as the Children's Health Insurance Program) depending on their family income level. Family cost-sharing may apply.
3. **HUSKY C:** Connecticut residents who are age 65 or older or residents who are ages 18-64 and who are blind, or have another disability, may qualify for Medicaid coverage under HUSKY C (this includes Medicaid for Employees with Disabilities (MED-Connect), if working). Income and asset limits apply.
4. **HUSKY D:** Connecticut residents who are ages 19-64 without dependent children and who: (1) do not qualify for HUSKY A; (2) do not receive Medicare; and (3) are not pregnant, may qualify for HUSKY D (also known as Medicaid for the Lowest-Income populations).
5. **HUSKY Health Program:** The HUSKY A, HUSKY B, HUSKY C, HUSKY D and HUSKY Limited Benefit programs, collectively.
6. **HUSKY Limited Benefit Program or HUSKY, LBP:** Connecticut's implementation of limited health insurance coverage under Medicaid for individuals with tuberculosis or for family planning purposes and such coverage is substantially less than the full Medicaid coverage.
7. **Medically Necessary or Medical Necessity:** (as defined in Connecticut General Statutes § 17b-259b) Those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.
8. **Prior Authorization:** A process for approving covered services prior to the delivery of the service or initiation of the plan of care based on a determination by CHNCT as to whether the requested service is medically necessary.

## PUBLICATION HISTORY

Status	Date	Action Taken
Original publication	January 2025	Approved at the CHNCT Medical Reviewer meeting on February 12, 2025. Approved by the CHNCT Clinical Quality Subcommittee on March 17, 2025. Approved by DSS on April 3, 2025
Update	February 2026	Removed Beqvez from policy as this medication has been discontinued as of late February 2025 and changed the title of the policy to Hemgenix. Reworded sections of the criteria for clarity. Added criteria regarding monitoring liver function and factor IX activity after gene therapy administration. Edited procedure section to include letter of medical necessity and provider attestation for applicable criteria. Updated references. Approved at the CHNCT Medical Reviewer meeting on February 25, 2026 Approved by the CHNCT Clinical Quality Subcommittee on March 16, 2026. Approved by DSS on April 2, 2026.

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on [www.ct.gov/husky](http://www.ct.gov/husky) by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at [www.ctdssmap.com](http://www.ctdssmap.com).
