

Pediatric Health Measures

HEDIS® MY 2023

1. **Child and Adolescent Well-Care Visits (WCV)** – The percentage of members 3-21 years of age who had at least one comprehensive well-care visit with a primary care provider (PCP) or an OB/GYN practitioner during the measurement year.
2. **Immunizations for Adolescents (IMA)** – The percentage of adolescents 13 years of age who had one dose of meningococcal vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine series by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.
3. **Lead Screening in Children (LSC)** – The percentage of children 2 years of age who had one or more capillary or venous lead blood test for lead poisoning by their second birthday.

CUSTOM

4. **Asthma Emergency Room** – The percentage of members 2-20 years of age diagnosed with asthma during the measurement year with one or more asthma-related emergency room (ER) visits.
5. **Behavioral Health Screening (Ages 1-18)** – The percentage of members 1-18 years of age who received an annual behavioral health screen within the 12 months prior to their birthday.
6. **Developmental Screening in the First Three Years of Life (DEV-CH)** – The percentage of members screened for risk of developmental, behavioral, and social delays using a standardized screening tool in the 12 months preceding their first, second, or third birthday.

Adult Health Measures

HEDIS® MY 2023

1. **Breast Cancer Screening (BCS)** – The percentage of women 50-74 years of age who had a mammogram to screen for breast cancer. *Note: Eligible population is women 52-74 years of age as of December 31st of the measurement year.*
2. **Chlamydia Screening in Women (CHL)** – The percentage of women 16-24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year.
3. **Kidney Health Evaluation for Patients with Diabetes (KED)** – The percentage of members 18–85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate (eGFR) *and* a urine albumin-creatinine ratio (uACR), during the measurement year.
4. **Use of Imaging Studies for Low Back Pain (LBP)** – The percentage of members 18-75 years of age with a primary diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis.

CUSTOM

5. **Post-Admission Follow-up Within Seven Days of an Inpatient Discharge** – The percentage of inpatient medical or behavioral health admissions for members 21-75 years of age with a claim for post-admission follow-up with a physician, PA, or APRN within seven days of the inpatient discharge. Medical admissions are defined as all admissions that are not maternity or surgery related.

Challenge Pool Measures

1. **Pediatric - Behavioral Health Screening (Ages 1-18)** – The percentage of members 1-18 years of age who received an annual behavioral health screen within the 12 months prior to their birthday.
2. **Adult - Eye Exam for Patients with Diabetes (EED)** - The percentage of members 18–75 years of age with diabetes (types 1 and 2) who had a retinal eye exam. This includes diabetics who had one of the following:
 - a. A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year.
 - b. A negative retinal or dilated exam (negative for retinopathy) by an eye care professional (optometrist or ophthalmologist) in the year prior to the measurement year.
